Draft Submitted in February, 2021

Final report submitted February 2021

## Foreword

India stands at first position in terms of cattle and buffalo population in the World. The population of cattle and buffalo in India was 192.49 million and 109.85 million in 2019 which accounts for around 19.5 per cent and 54.6 per cent share respectively of World cattle and buffalo population. However, the productivity of dairy animals in India is very low as compared to other countries. The reason cited for this is inappropriate feeding as well as inadequate supplies of quality feeds and fodder in addition to the low genetic profile of the Indigenous breeds. It will not be possible to achieve higher productivity in a milch animal by merely increasing its genetic potential, due attention needs to be given on proper feeding of milch animal. There is evidence to show that when a milch animal is fed with balanced diet, it receives the required nutrients to produce milk commensurate with its genetic potential. Research and field trials indicate that this approach to feeding has the potential to increase milk yield, reduce cost of milk production, and contribute to reducing methane emissions. Milch animals in India are usually fed one or two locally available concentrate feed ingredients, locally available grasses and crop residues. This often leads to an imbalanced ration—resulting in proteins, energy, minerals and vitamins being either in excess or deficient. Imbalanced feeding adversely impacts not only on the health and productivity of animals but also affects income from milk production since an estimated 70 per cent of the total cost of milk production is contributed by feed and fodder alone. Therefore, there is a need to educate milk producers on feeding balanced ration to their animals so that the nutrients required by their individual milch animals is fulfilled in an optimum manner, thereby improving milk production efficiency and the economic return.

With an aim to increase productivity of milch animals and thereby increase milk production to meet the rapidly growing demand for milk as well as to provide rural milk producers with greater access to the organized milk-processing sector, Government of India had approved the scientifically planned multi-state initiative, i.e. National Dairy Plan Phase I (NDP I) as a Central Sector Scheme for a period of six years from 2011-12 to 2016-17, which is extended up to 2018-19. This plan is implemented wholly by National Dairy Development Board, Anand (Gujarat) through milk co-operatives and state agencies. The project includes a number of programs, of which Ration Balancing Program (RBP) was designed with an aim to improve milk yield of milch animals, reduce the feeding costs/kg of milk produced and reduction in methane release per kg of milk produced by animals.

Under the productivity enhancement program of NDP-I, among various other components, implementation of 'Ration Balancing Program' of dairy animals was also implemented in selected Dairy Unions of Maharashtra. The Kolhapur, Solapur and Pune milk unions has implemented NDDB's ration balancing programme covering around 600 villages with an aim to cover about 56000 milch animals in these milk sheds. The positive impacts of Ration Balancing Programme under

NDP-I in selected district/milk unions of Maharashtra has been inspirational and therefore it was decided to take forward this project in Vidarbha and Marathawada regions through Vidarbha Marathawada Dairy Development Board (VMDDP) in 2019 under Rashtriya Krishi Vikas Yojana. RBP under VMDDP plans to cover 10 districts. Through Tri Party MOU, this RBP is being implemented in three districts, viz. Nagpur, Wardha and Amravati districts by MoovFarm Private Limited Gurgaon, Haryana on pilot basis in October 2019. Six months was the duration agreed for this project which ended on April 22, 2020. Due to unprecedented situation of COVID19 Pandemic, the operational; period has been extended till October 22, 2020. NDDDB is involved in this pilot project as a technical monitoring and advisory agency. Under this RBP programme, it was reported that total 400 villages are covered with 13600 animals of 6800 farmers and it is estimated reduction of cost of feeding by 7 percent. As the project period got completed and for future plan of action, it was felt necessary by VMDDP, Nagpur to have impact evaluation of this program before proceeding further. Therefore, present study was undertaken by our Centre in the selected three districts of Vidarbha region of Maharashtra state.

The study has been completed within a very short span of two-month period under the shadow of COVID19 pandemic and came out with the suitable policy implications. I would like to congratulate the entire project team for collecting quality data and preparing this excellent research report. I hope findings of the study would be useful for policy makers, funding agency and administrators of this programme.

(Dr. Shirish Kulkarni)  
Vice Chancellor

## Acknowledgements

The study on “Impact Assessment and Evaluation of Ration Balancing Program in Vidarbha and Marathawada Dairy Development Project in Maharashtra State” has been carried out at the Agro-Economic Research Centre, Sardar Patel University, Vallabh Vidyanagar, as desired and sponsored by the Vidarbha Marathawada Dairy Development Project (VMDDP), Nagpur, Maharashtra.

We have benefited immensely from various scholars and officials from different government departments while carrying out this study. At the outset, we would like to thank **Dr. Shirish Kulkarni**, Vice Chancellor of our University and Chairman, AERC Advisory Body for his constant encouragement for undertaking such research activity at the Centre. We also thank **Dr. Jyoti Tiwari**, Registrar (In-charge) and **Dr. Bhautik A. Patel** (Deputy Accountant) of our University for their administrative support for this project.

Special thanks to **Shri. Anoop Kumar, Hon. Principal Secretary, Animal Husbandry and Dairying, Government of Maharashtra**; **Shri. Sachindra Pratap Singh**, Commissioner Animal Husbandry, Government of Maharashtra and other officers of Department of Animal Husbandry and Dairy Development, Government of Maharashtra; District Deputy Commissioners of Animal Husbandry for their feedback on presentation about the progress of study made online on February 12, 2021.

We are grateful to the **Shri Ravindra Thakare, District Collector, Nagpur district, Maharashtra** and Project Director Vidarbha Marathawada Dairy Development Project (VMDDP), Nagpur, Maharashtra for approaching us for this research study work and guiding us during the entire study period.

We are grateful to the **Dr. Sathish Raju**, Additional Project Director, Vidarbha and Marathawada Dairy Development Project & Regional Manager, Additional Frozen Semen Laboratory, Telangkhedi, Bharatnagar, Nagpur for acting as a Coordinator and providing all necessary support and help required during the field survey work as well as processing of invoices and related submission. We also thank **Dr. Rajesh Sharma** (Senior Manager, Animal Nutrition), NDDB, Nagpur for providing us the INAPH datasets. Thanks to **Dr. S. S. Puri** (VMDDP, Nagpur), **Dr. Atul Mahajan**, **Mr. Sachin** (NDDB, Nagpur), and officers of Mother Dairy, Nagpur for their support.

We are also grateful to **Dr. Ulhas Chandrabhan Nimkar** and his team of ‘Vishwas Group’ in Aroli village of Mauda tehsil of Nagpur district for sharing with us the progress of the collective production and marketing of milk as well as perennial fodder production and marketing model.

Thanks to **Madam Manju Singh**, Mooofarm Pvt. Limited, Gurgaon, Haryana and team of Mooofarm on field (includes Cluster Coordinators and Local Resource Persons) of all three districts under study for their support and cooperation during the field survey work.

The study would not have reached to this stage without the active co-operation of the Local Resource Persons and sample households (beneficiaries, non beneficiaries), who provided all the required data for the study without any hesitation and expectation. We thank each one of them for their invaluable support.

Special thanks to faculty members of College of Agriculture, Nagpur; **Dr. Rupesh S. Zodade**, Krishi Vigyan Kendra, Selsura, Wardha and Shri Shivaji College of Agriculture, Amravati; **Shri Kishor Chaudhary**, Department of Agriculture, Government of Maharashtra, Kantanagar, Amravati.

We thank all the field investigators/field staff who have collected the field data in very short period of time.

We have also received support and encouragements from our colleagues in the Centre while carrying out the study. Special thanks to Shri Thansigh B. Parihar, Ms. Kalpana Kapadia, Shri Jasawant Singh and Shri Mihir Rana for their support in data feeding and data analysis. Thanks to Shri D. N. Thakkar, Shri Deep Patel, Shri Vinod Parmar, and all staff of AERC for providing necessary support.

Lastly but not least, we thank all the staff of our University, AERC and CCS for their direct and indirect support.

<b>Chapter I</b>	<b>Introduction</b>	<b>1</b>
	1.1 Introduction	
	1.2 Objectives of the study	
	1.3 Database	
	1.4 Survey Design	
	1.4.1 Sampling Framework	
	1.4.2 Quality of data	
	1.4.3 PERT Chart of Work done	
	1.4.4 Development of Survey schedule	
	1.5 Analytical Framework	
	1.5.1 Effects and Outcomes	
	1.5.2 Effectiveness	
	1.5.3 Sustainability	
	1.5.4 Lessons learned	
	1.6 Limitations of the Study	
	1.7 Organization of Report	
<b>Chapter II</b>	<b>Need of RBP and Achievements of RBP under NDP-I</b>	<b>19</b>
	2.1 Introduction	
	2.2 National Dairy Plan Phase I (NDP I)	
	2.3 Need of Ration Balancing	
	2.4 NDDB's Ration Balancing Program Software INAPH	
	2.5 Achievements under NDP I	
	2.6 Chapter Summary	
<b>Chapter III</b>	<b>About Study Area and VMDDP</b>	<b>27</b>
	3.1 Introduction	
	3.2 Role of Dairy Sector in State Economy of Maharashtra	
	3.3 Composition of Livestock in the State	
	3.4 Growth in Milk Production and Productivity	
	3.5 Status of Availability of Feed and Fodder	
	3.6 Dairy Development in Maharashtra	
	3.7 Genesis of VMDDP	
	3.8 Chapter Summary	

<b>Chapter IV</b>	<b>Implementation and Monitoring of RBP by EIA</b>	<b>47</b>
	4.1 Introduction	
	4.2 About End Implementing Agency (EIA)	
	4.3 Targets and Achievements	
	4.4 RBP Implementations	
	4.4.1 Training Programs	
	4.4.2 Village Awareness Programme Organized	
	4.4.3 RBP Material distribution	
	4.4.4 Use of INAPH	
	4.4.5 LRP-Village Coverage	
	4.4.6 Remuneration Paid to LRP	
	4.5 Impact of RBP	
	4.6 Constraints faced by EIA	
	4.7 Opinions and Suggestions of EIA of RBP	
	4.8 Chapter Summary	
<b>Chapter V</b>	<b>Findings from Secondary Data</b>	<b>63</b>
	5.1 Introduction	
	5.2 Progress of RBP in Selected three districts of Vidarbha	
	5.3 Impact of RBP in Selected three districts of Vidarbha	
	5.4 Chapter Summary	
<b>Chapter VI</b>	<b>About Selected Villages, Sample Households &amp; LRPs</b>	<b>69</b>
	6.1 Introduction	
	6.2 About Region and Selected Districts	
	6.3 About Selected Villages	
	6.4 About Sample Households	
	6.4.1 Profile of Selected Households	
	6.4.2 Socio-Economic Characteristics	
	6.4.3 Communication Characteristics	
	6.4.4 Holding of Productive Assets	
	6.4.5 Cropping Pattern	
	6.5 About Local Resource Persons (LRP)	
	6.6 Chapter Summary	
<b>Chapter VII</b>	<b>Findings from Field Survey Data</b>	<b>85</b>
	7.1 Introduction	
	7.2 Livestock Holdings/Herd Strength	
	7.3 Breedable Animals	
	7.4 Details of Feed and Fodder	
	7.5 Details on Prices of Feed and Fodder and Wages	
	7.6 Details on Veterinary & Breeding Services & Expenditures	
	7.7 Labour Use Pattern	
	7.8 Handling of Feeding and Income from Dairying	
	7.9 Production of Milk	

	7.10 Disposal of Milk and Dung	
	7.11 Awareness about RBP among Adopters	
	7.12 Outreach of RBP among Adopters and its Benefits	
	7.13 Performance of LRPs	
	7.14 Chapter Summary	
<b>Chapter VIII</b>	<b>Opinion of Local Resource Persons</b>	<b>111</b>
	8.1 Introduction	
	8.2 Functioning under LRP	
	8.3 Constraints Faced by LRPs	
	8.4 Opinions and Suggestions by LRPs	
	8.5 Chapter Summary	
<b>Chapter IX</b>	<b>Conclusions and Policy Implications</b>	<b>119</b>
	9.1 Conclusions	
	9.2 Policy Implications
