Vallabh Vidyanagar, Gujarat
(Reaccredited with 'A' Grade by NAAC (CGPA 3.25))
Syllabus with effect from the Academic Year 2022-2023

PROGRAMME STRUCTURE
Master of Science in Chemistry
MSc (Inorganic Chemistry) Semester: III

<p>Programme Outcome (PO) - For MSc Chemistry Programme</p>	<p>Master of Science program provides extended theoretical and practical knowledge of different science subjects. Master of Science programme at Sardar Patel University is designed keeping the overall back ground preparation in mind for the student to either seek a job or to become an entrepreneur. The students, after completion of Bachelor of Science can select the master's programme in the subject they have had at the final year or in a related discipline (depending upon eligibility criteria prescribed by university).</p> <p>Programme outcomes: At the end of the program, the students will be able to</p> <ol style="list-style-type: none">1. Have a deep understanding of both the theoretical and practical concepts in the respective subject.2. Understand laboratory processes and use scientific equipments and work independently.3. Develop research temperament as a consequence of their theory and practical learning.4. Communicate scientific information in oral and written form.5. Understand the issues related to nature and environmental contexts and think rationally for sustainable development.6. The students are able to handle unexpected situations by critically analyzing the problem.
<p>Programme Specific Outcome (PSO) - For MSc Chemistry Semester - I</p>	<p>Students will have a firm foundation in the fundamentals and application of current chemical and scientific theories including those in Analytical Inorganic Chemistry, Organic Chemistry, Physical Chemistry, Chemistry and Industrial polymer Chemistry.</p> <p>After completing M.Sc. chemistry program, students will be able to:</p> <ul style="list-style-type: none">■ Demonstrate and apply the fundamental knowledge of the basic principles in various fields of Chemistry.■ Apply knowledge to build up small scale industry for developing endogenous product.■ Collaborate effectively on team-oriented projects in the field of chemistry or other related fields.■ Communicate scientific information in a clear and concise manner both orally and in writing.■ Inculcate logical thinking to address a problem and become result oriented with a positive attitude. <ul style="list-style-type: none">■ Enhance the scientific temperament among the students so as to develop a research culture and implementation of the policies to tackle the burning issues at global and local level.

SARDAR PATEL UNIVERSITY
Vallabh Vidyanagar, Gujarat
(Reaccredited with 'A' Grade by NAAC (CGPA 3.25))
Syllabus with effect from the Academic Year 2022-2023

	<ul style="list-style-type: none"> ■ Apply the knowledge to develop the sustainable and eco-friendly technology. ■ Take up global level research opportunities to pursue Ph.D programme targeted approach and specific competitive exams conducted by service commission ■ Accept enormous job opportunities at all level of chemical industries, pharmaceutical industries and placements in R & D.
--	---

To Pass	At least 40% Marks in the University Examination in each paper and 40% Marks in the aggregate of University and Internal examination in each course of Theory, Practical & 40% Marks in Viva-voce.

* Project work (as optional) in place of practicals; to be offered to some of the students, based on their merit, interest and placement with the teachers (Marks : 200). The project shall have to be carried out under the allotted teacher(s) and a dissertation shall be submitted and will be assessed for internal (60 marks) and external (140 marks), in the usual manner.

Master of Science, Inorganic Chemistry
M.Sc. Inorganic Chemistry, Semester (III)

Course Code	PS03CINC51	Title of the Course	Spectroscopy-I
Total Credits of the Course	4	Hours per Week	4

Course Objectives:	<ol style="list-style-type: none">1. The students explain the basic theory of important spectroscopic techniques.2. The students apply spectroscopic techniques for qualitative and quantitative analysis of organic and inorganic substances.3. The students analyse spectral data to elucidate the structures of organic and inorganic molecules/ species.4. The students predict the possible uses of spectroscopic techniques in analysis of chemicals.
--------------------	--

Course Content		
Unit	Description	Weightage* (%)
1.	<p>Infrared Spectroscopy Theory of Infrared (IR) Spectroscopy, Molecular vibrations, Characteristic group absorption frequencies, Interpretation of spectra.</p> <p>Ultraviolet Spectroscopy Theory of electronic transition and Ultraviolet (UV) absorptions, chromophores and auxochromes, Woodward-Fisher rules, Fieser-Kuhn rule, Characteristic absorptions in various compounds, Interpretation of UV spectra</p>	25%
2.	<p>Nuclear Magnetic Resonance Spectroscopy ^1H Nuclear Magnetic Resonance (^1H NMR) spectroscopy, Chemical shifts and factors affecting chemical shifts, Splitting of the signals – spin couplings and coupling constants, Chemical shift equivalence and magnetic equivalence, ^{13}C-NMR spectroscopy, Proton coupled and decoupled ^{13}C NMR spectra, Chemical shifts in ^{13}C NMR spectra and their calculation, ^{13}C-^1H coupling constants, ^{13}C - DEPT spectra, Nuclear Overhauser Effect, NMR Spectroscopy of other important spin $1/2$ nuclei (^{15}N, ^{19}F, ^{27}Al, ^{29}Si, ^{31}P), Interpretation of NMR spectra</p>	25%
3.	<p>Electron Spin Resonance Spectroscopy Theory of Electron Spin Resonance (ESR) Spectroscopy, Instrumentation, Factors affecting the g-values, Differences between NMR and ESR, Hyperfine interactions, Interpretation of ESR spectra, Applications of ESR</p>	25%
4.	<p>Mass Spectroscopy Theory of Mass Spectroscopy, Instrumentation, Ionization techniques, Mass analyzers, Fragmentations and rearrangements, Interpretation of</p>	25%

Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	Internal Written / Practical Examination (As per CBCS R.6.8.3)	15%
2.	Internal Continuous Assessment in the form of Practical, Viva-voce, Quizzes, Seminars, Assignments, Attendance (As per CBCS R.6.8.3)	15%
3.	University Examination	70%

Course Outcomes: Having completed this course, the learner will be able to	
1.	Explain the theory, instrumentation and application of important spectroscopic techniques such as IR, UV-vis, NMR and mass spectrometry.
2.	Determine the structure of organic and inorganic compounds using spectroscopic techniques.
3.	Analyse the spectral data of organic and inorganic substances.
4.	Acquire the knowledge of instrumentation of various modern spectrometers.

PROGRAMME STRUCTURE
Master of Science in Chemistry
MSc (Inorganic Chemistry) Semester: IV

<p>Programme Outcome (PO) - For MSc Chemistry Programme</p>	<p>Master of Science program provides extended theoretical and practical knowledge of different science subjects. Master of Science programme at Sardar Patel University is designed keeping the overall back ground preparation in mind for the student to either seek a job or to become an entrepreneur. The students, after completion of Bachelor of Science can select the master's programme in the subject they have had at the final year or in a related discipline (depending upon eligibility criteria prescribed by university).</p> <p>Programme outcomes: At the end of the program, the students will be able to</p> <ol style="list-style-type: none">1. Have a deep understanding of both the theoretical and practical concepts in the respective subject.2. Understand laboratory processes and use scientific equipments and work independently.3. Develop research temperament as a consequence of their theory and practical learning.4. Communicate scientific information in oral and written form.5. Understand the issues related to nature and environmental contexts and think rationally for sustainable development.6. The students are able to handle unexpected situations by critically analyzing the problem.
<p>Programme Specific Outcome (PSO) - For MSc Chemistry Semester - IV</p>	<p>Students will have a firm foundation in the fundamentals and application of current chemical and scientific theories including those in Analytical Inorganic Chemistry, Organic Chemistry, Physical Chemistry, Chemistry and Industrial polymer Chemistry.</p> <p>After completing M.Sc. chemistry program, students will be able to:</p> <ul style="list-style-type: none">■ Demonstrate and apply the fundamental knowledge of the basic principles in various fields of Chemistry.■ Apply knowledge to build up small scale industry for developing endogenous product.■ Collaborate effectively on team-oriented projects in the field of chemistry or other related fields.■ Communicate scientific information in a clear and concise manner both orally and in writing.■ Inculcate logical thinking to address a problem and become result oriented with a positive attitude.

SARDAR PATEL UNIVERSITY
Vallabh Vidyanagar, Gujarat
(Reaccredited with 'A' Grade by NAAC (CGPA 3.25))
Syllabus with effect from the Academic Year 2022-2023

	<ul style="list-style-type: none"> ■ Enhance the scientific temperament among the students so as to develop a research culture and implementation of the policies to tackle the burning issues at global and local level. ■ Apply the knowledge to develop the sustainable and eco-friendly technology. ■ Take up global level research opportunities to pursue Ph.D programme targeted approach and specific competitive exams conducted by service commission ■ Accept enormous job opportunities at all level of chemical industries, pharmaceutical industries and placements in R & D.
--	---

To Pass	At least 40% Marks in the University Examination in each paper and 40% Marks in the aggregate of University and Internal examination in each course of Theory, Practical & 40% Marks in Viva-voce.

EMPLOYABILITY = EM, ENTREPRENEURSHIP = EN and SKILL DEVELOPMENT = SD

* Project work (as optional) in place of practicals; to be offered to some of the students, based on their merit, interest and placement with the teachers (Marks : 200). The project shall have to be carried out under the allotted teacher(s) and a dissertation shall be submitted and will be assessed for internal (60 marks) and external (140 marks), in the usual manner.

Master of Science, Inorganic Chemistry
M.Sc. Inorganic Chemistry, Semester (IV)

Course Code	PS04CINC51	Title of the Course	Spectroscopy-II
Total Credits of the Course	4	Hours per Week	4

Course Objectives:	<ol style="list-style-type: none">1. The students explain the theory of spectroscopic and microscopic techniques used for characterization of inorganic materials.2. The students apply spectroscopic techniques for qualitative and quantitative analysis of inorganic substances.3. The students analyse spectral data to characterize inorganic species.4. The students predict the possible uses of spectroscopic and microscopic techniques in material characterization.
--------------------	---

Course Content		
Unit	Description	Weightage* (%)
1.	Atomic Absorption/Atomic and Flame Emission Spectroscopy Absorption of radiation by atoms; equipment: radiation sources (Hollow cathode lamps and electrode less discharge lamps); atomizers (Flame and carbon); wavelength selector and detectors; interferences in atomic absorption spectroscopy; applications and problems: qualitative and quantitative analysis. Introduction to plasma, arc and spark emission spectroscopy; equipment: inductively coupled plasma spectrometer and flame photometer; applications and problems	25%
2.	Mossbauer Spectroscopy Mossbauer effect, and experimental methods, hyperfine interactions, molecular structure, electronic structure, applications of Mossbauer spectroscopy	25%
3.	Electron Spectroscopy Introduction, principle and theory of electron spectroscopy, Notations, X-ray Photoelectron Spectroscopy (XPS), Ultraviolet Photoelectron Spectroscopy (UPS), Auger Electron Spectroscopy (AES), Instrumentation of electron spectroscopy, Qualitative and Qualitative analysis by electron spectroscopy, Chemical shifts, Unwanted features in electron spectra, Applications of electron spectroscopy	25%
4.	Microscopic Techniques Introduction to scanning electron microscopy (SEM), Scanning tunneling microscopy (STM) and atomic force microscopy (AFM), basic principles and theory,	25%

	instrumentation and operating parameters and applications	
--	---	--

Teaching-Learning Methodology	Class room teaching, seminars, quizzes, and assignments
-------------------------------	---

Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	Internal Written / Practical Examination (As per CBCS R.6.8.3)	15%
2.	Internal Continuous Assessment in the form of Practical, Viva-voce, Quizzes, Seminars, Assignments, Attendance (As per CBCS R.6.8.3)	15%
3.	University Examination	70%

Course Outcomes: Having completed this course, the learner will be able to	
1.	Explain the theory and instrumentation of important spectroscopic techniques such as Atomic Absorption Spectroscopy, Mossbauer Spectroscopy and Electron Spectroscopy, and microscopic techniques.
2.	Apply spectroscopic and microscopic techniques for characterization of inorganic materials.
3.	Analyse spectroscopic and microscopic data of inorganic substances.
4.	Acquire the knowledge of instrumentation of various modern spectrometers.

Master of Science, Inorganic Chemistry

M.Sc. Inorganic Chemistry, Semester (IV)

Course Code	PS04CINC52	Title of the Course	Solid State and Supramolecular Chemistry
Total Credits of the Course	4	Hours per Week	4

Course Objectives:	<ol style="list-style-type: none">1. The students explain crystal systems, crystal classes, lattice structure and types of lattices.2. The students explain the classification of perfect and imperfect crystals, intrinsic and extrinsic defects, point defects, line and plane defects, Schottky defects and Frenkel defects.3. The students know optical reflectance, photoconduction and photoelectric effects.4. The students apply supramolecular chemistry for various applications.5. The students explain the principles and types of solid-state reactions.6. The students explain the classification of supramolecular Host-Guest compounds and cation, anion and neutral binding hosts.
--------------------	--

Course Content		
Unit	Description	Weightage* (%)
1.	Solid State Chemistry Classification of Solids, Symmetry In Crystals, Crystallography and Its Law, Interfacial Angles, Miller Indices, And Bravais Lattices, Crystal Lattice and Unit Cell, Packing In Solids (Simple, FCC, BCC and HCP Lattices), Radius ratio, Efficiency, Voids, Density, Radii, and Coordination Number, Bragg's Equation and Its Application, Separation of Planes, Electron Neutron Diffraction, Imperfection In Solids (All Defects), Band Model and Bonding In Metals	25%
2.	Optical Properties: Optical reflectance, photoconduction and photoelectric effects, Lasers, Organic solids – electrically conducting solids, organic charge transfer complex, organic metals, new superconductors Solid State Reactions: General Principles, types of solid-state reactions, experimental procedures, co-precipitation as a precursor to solid state reactions, Wagner mechanism of solid-state reactions, sol-gel method, kinetics of solid-state reactions	25%
3.	Basics of Supramolecular Chemistry Definition and development of supramolecular chemistry, Classification of supramolecular Host-Guest compounds, Receptors,	25%

	coordination and lock and key analogy, Binding constants, Cooperativity and the chelate effect, Preorganization and complementarity, Thermodynamic and kinetic selectivity and discrimination, Nature of supramolecular interactions, Solvation and hydrophobic effects, Supramolecular concepts and design	
4.	Cation binding hosts Selectivity of cation complexation, Soft ligands for soft metals, Different cation binding hosts Anion binding hosts Introduction, From cation hosts to anion hosts- a simple change in pH, Some anion hosts Binding of neutral molecules Interactivity complexes of neutral molecules: solution and solid-state binding, Some neutral binding hosts	25%

Teaching-Learning Methodology	Class room teaching, seminars, quizzes, and assignments
-------------------------------	---

Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	Internal Written / Practical Examination (As per CBCS R.6.8.3)	15%
2.	Internal Continuous Assessment in the form of Practical, Viva-voce, Quizzes, Seminars, Assignments, Attendance (As per CBCS R.6.8.3)	15%
3.	University Examination	70%

Course Outcomes: Having completed this course, the learner will be able to	
1.	Understand crystal systems, crystal classes, lattice structure and types of lattices.
2.	Know the classification of perfect and imperfect crystals, intrinsic and extrinsic defects, point defects, line and plane defects, Schottky defects and Frenkel defects.
3.	Learn and appraise optical reflectance, photoconduction and photoelectric effects.
4.	Acquire the knowledge of development of supramolecular chemistry.
5.	Explain the principles and types of solid-state reactions.

6.	Explain the classification of supramolecular Host-Guest compounds and cation, anion and neutral binding hosts.
