Foreword

“Education without character is of no value. We must be intent on producing citizens of free India. But not helpless ones loitering for jobs”

-Sardar Vallabhbhai Patel

These words of the architect of the modern integrated India are apt in the backdrop of ongoing nationwide restructuring of education system as per the National Education Policy 2020 (NEP 2020). Higher education institutions (HEI) are the backbone of a nation as they are the most important stakeholders in nurturing, training and shaping the raw young generation which drives the nation building through their innovative contributions in social, economic and technological sectors. It is also a prime responsibility of a HEI to inculcate the values of equitability, social justice, ethics and humanity among the young minds for evolving a healthy and civilized society that thrives in harmony with the nature and environment. A university is a dynamic entity and it has to keep evolving its ecosystem of academic, research and innovation to stay relevant and keep pace with the changes in the national and international level. Annual report of the university allows to take the stock of its progress and identify its strength and weaknesses. It gives an opportunity to propose new initiatives to build upon the existing strong areas and take necessary corrective measures to address the weaknesses.

The year 2021-22 follows the years of devastating COVID-19 pandemic and the university become fully functional like the pre-COVID times. Rather, it has come out with more robustness in its day-to-day functioning and learnt the ways to deal with such natural exigencies. While this annual report gives a detailed account of the achievements of the university in the areas of academics, research, extension and extra-curricular activities, I would highlight a few major successes and initiatives of the university during the year 2021-22. COVID did not dampen the spirit of the university in fulfilling its motto of “*Excellence Matters*”. The university endeavoured to undergo the 4th Cycle of NAAC accreditation during the year and successfully submitted the Self Study Report (SSR) in July 2022. While this report is being published, I am pleased to share that the university has acquired ‘A’ grade with CGPA with 3.11. The university has acquired four-star ranking in GSIRF 2022. Several important steps have been taken to implement the NEP 2020 effectively. The university has registered in the academic bank of credit (ABC) and expedited the process of registration of students. NEP cell has been established to coordinate the related activities. Research and Development Cell (RDC) has also been established to restructure the research ecosystem in tune with NEP. The curricula of the academic programmes have been revised to incorporate the components like skill enhancement and Indian knowledge system. PhD facilitation centre has been activated with the help of the grant from the Government of Gujarat. It is also heartening to mention the success of the university in filling up the most of the vacant teaching posts sanctioned by the government. The university has undergone the exercise of Green Audit and achieved the Platinum Ranking to become the first Green University in Gujarat. There

are many other accolades earned by the various departments, centres and administrative units of the university. I wish I could mention all here. However, I opine that the reader would benefit more by exploring the relevant section of this report. I am also sure that this report would be an important guide for the university as well as the third-party stakeholder across the world to assess the status and stature of the university.

It goes without saying that preparation of such a comprehensive report summarizing the annual activities of the university is a humungous exercise with a meticulous planning. The efforts of the team of the teaching and non-teaching staff members involved in the preparation of this report is commendable. I congratulate all the members for bringing out the report in its existing form.

CHAPTER-1 CURRICULAR ASPECTS

The UGC has identified teaching-learning, research, extension services, corporate activities and consultancy as the five major areas where teachers must contribute. The first in the list are teaching-learning which, as a criterion in the NAAC list, carries substantial Weighting. Teaching-learning is woven around a curriculum in any institution. Students derive benefit from a well thought-out curriculum accounting for the latest Modern developments in a chosen field of specialisation. We have followed the Semester wise Choice Based Credit System since 2010-11. Periodic revision of courses every three years is among our best practices. The last periodic revision of the new course was passed by Academic Council in the year of 2017-18 as per UGC Model Course Curriculum.

The University offers numerous programmes across disciplines in the form of Postgraduate Degree Courses, Postgraduate Diploma Courses, Diploma Courses, and Certificate Courses in its Postgraduate Departments and a Constituent College while Undergraduate Degree programmes are offered in its colleges affiliated to it. Admission to masters programmes and there are entrance tests conducted and merit lists based on the results of these are used for admission to professional courses. Admission to PhD programmes are in compliance with the UGC mandate and other professional bodies, as the case may be. We have made provisions for mandatory coursework for those admitted to our PhD programmes. Also for submission of Ph.D. Thesis University has prepared the plagiarism policy as per guidelines of UGC well established & Implemented from 2020-21.

All courses under the curriculum are examined in detailed before being passed by respective Boards of Studies, Faculty concerned, Postgraduate Board of Studies, Academic Council, Senate, and the Executive Council.

CHAPTER-2

TEACHING-LEARNING AND EVALUATION

Teaching-Learning is a core ingredient in the constitution of any University. It is the methodology of implementation that differentiates the university from others. The university has been keeping in its nucleolus, what the Iron Man of India envisioned about the education in Independent India. Keeping the character building and spreading education in the rural sector of India is central to Sardar Patel University. University is following his words literally, *शील वृत्त फलम् श्रुतम्* “Education without character is of no value. We must be intent on producing citizens of Independent India and not helpless people loitering for jobs.” This was enlarged later on into emphasis on excellence: “Excellence Matters”, the slogan we implemented in our practice during the celebration of our platinum jubilee year of our existence as a state university.

Teaching and learning should ideally lead to change in behaviour patterns and behaviour potential, for this is vital in shaping attitudes, knowledge, understanding, and appreciation. Our mission as a university has been ‘to accelerate the process of regeneration of villages by the application of modern arts, sciences and technology to rural requirements’. This requires constant self-assessment and constant assessment and reassessment of future needs which alone would help us achieve the target of creating future citizens of this country who would not only be self-reliant but would also have the ability to be self-employed. The region of Gujarat we serve, Charotar, is known for entrepreneurs and philanthropists. We, Charotar, are business-oriented and prefer to be self-employed and create employment for others rather than be employed by others. Our special *surban* (a recent coinage) reflecting partly-rural-partly-urban setting has allowed us to retain the uniqueness of guru-shishya parampara even if it may be in the absence of its ashram-type style of existence in that tradition.

We take legitimate pride in the fact that we have a robust system of teaching-learning which involves lecture, lecture-cum-workshop, lecture-demonstration, course-specific classroom seminars, tutorials, quizzes etc as a part of our strategy. We have also evolved a transparent and accountable system of evaluation involving blind assessment using non-transparent flapping of their seat numbers by the examinees at the end of an examination; secure centralised process of evaluation and compilation of results; speedy and confidential reassessment by external examiners outside this university; stricter penalties for unethical methods used by the students or evaluators after a free and fair hearing by the Unfair Means Committee appointed by the University Syndicate; on-the-spot verification of marked answerscripts by any student harbouring doubts about the outcome of evaluation; creation of grievance redressal committee etc voluntarily and as mandated by the UGC or the Education Department of the Government of Gujarat. All this has led to stress-free examinations and timely declaration of results. From academic year: 2018-19. Sardar Patel University has started on demand examination in which student who fails in any subject can Demand for examination and appear in examination. With on Demand examination student can complete their course of study with the stipulated time.

2.1 NUMBER OF ACADEMIC DAYS IN THE YEAR 2021-2022

Number of Days Devoted to Teaching, Admission, and Examinations at Undergraduate and Postgraduate Level 2021-2022

Level	(6 days a week pattern) Teaching and Learning process (week)	Admission/Examinations Preperation (week)
Postgraduate	30	12
Under graduate	30	10

The Academic calendar of colleges and University Departments in various faculties is prepared and announced well in advance. Alternative teaching arrangements are always made of the teachers, if a teacher is absent. Teachers mark the presence of the students in each lecture everyday. Normally every teacher is available in the department at least for six hours a day, irrespective of his/her lecture schedule on that given day. In fact, some of the science departments and management department function from 9:00 am to late in the evening and even on holidays. This increases the availability of teachers for students' counselling.

2.2 ADMISSION

The admission process for the Post-Graduate and Under Graduate courses is centralized and online. The students have to fill the admission form online. The prospectus is available online to the students. The prospectus is designed to introduce the creairvity, highlights the details of the admission process to guide the students in choosing the right academic programs.

The University issues an official notification for admission in mid-may every year & gets it published in the news papers with large circulation.

The students are asked to fill the forms online. After the deadline to fill the form is over, the forms are checked and merit list prepared & displayed on the University website. (spuvvn.edu.) The counseling datesand time are also announced on the wesite for different departments. The admission process is executed as per the schedule in a transparent way.

Each of the Departments in the University has an admission committee, usually with the Head as the convener, entrusted with the task of finalizing admissions. The committee has the brief of ensuring that admissions are granted strictly on the basis of merit. However, when there is provision of an entrance test for admission to a particular programme, a new merit list, which has a judicious mix of the initial merit and merit based on the results of the entrance test (intimated before hand in the Prospectus), is used for granting admissions. This way, we admit applicants in the order of merit against open seats, reserved seats for SC (7%), ST (15%), SEBC (27%), Physically/Visually handicapped (3%), EWS (10%) etc, and seats for students from other universities in Gujarat (10%) and the other states in the Union of India (20% seats set aside for them in Departments in the University recognized by the UGC under its Special Assistance Programme (SAP) because this is mandatory under the UGC provisions). The process is usually completed in a day or two at the most.

We use the e-mail, the Internet, bulk sms services and the telephone as tools to communicate effectively and efficiently within a short span of time. The academic calendars are ready by the time the admissions are over, and these are then displayed on the notice board in the Department concerned, which is how we are able to begin teaching immediately thereafter.

2.3 International Students

The International Students Centre (ISC) was established in Sardar Patel University in June 2004. The objectives behind its establishment are: (a) to assist the International Student Community by providing information related to various courses on offer in any given year, the procedure of admission to these courses, criteria governing eligibility, the fee to be paid etc, and (b) to facilitate the applicants in getting admission, help them settle down quickly and happily, take active interest in their studies, and take care of their welfare, including their security clearance from the local police, and so on. This centre also provides a link between International students and Institutes of their studies.

International Students Centre has been fortunate enough to attract a lot of foreign students every year, thanks to our need-based innovative courses on offer year after year. Our ISC has been singularly responsible for coordinating all the activities related to the admission of international scholars through a Single Window System ever since its inception. It coordinates with Indian Council for Cultural Relations (ICCR), Ministries of Human Resource Development (MHRD), External Affairs (MEA), and Home Affairs (MHA), as well as with different Embassies and Consulates for various purposes including assisting them in obtaining student or research Visa, Scholarships etc.

International Students Centre accommodates most of International Students in the University Staff Colony, Vallabh Vidyanagar to ensure their safety and give them peaceful atmosphere.

Dr. A. H. Hasmani, Professor and Head, Department of Mathematics has been taking care of ISC as Honorary Director, since 01 September 2017.

2.6 Teaching-Learning Avenues

Besides formal lectures and experiments in the laboratories, teachers use an array of other methods of teaching-learning such as lecture-cum-workshop, guest lectures by experts, projects, case studies, and summer training, supported by computer and Internet facilities, and special efforts made to prepare the learners to take NET-JRF, participation in research seminars in the department concerned. The following are the details:

(1) Seminars/Guest Lectures/Conferences

There is a provision for obligatory Students Seminars in each subject in Basic Sciences in each semester. Thus in every semester, every student has to present one seminar in each paper. Besides these there are weekly departmental researches seminars conducted during the year in the Departments like Department of Mathematics, Department of Physics, Department of Psychology Some laboratories in the Department of Biosciences which are accessible to PhD, MPhil, MSc students. The research conferences and other guest lectures are organized during the year.

(2) Projects and Summer Trainings

(a) There is a provision for mandatory research projects in the last semester in the Departments of Biosciences, Home Science, Statistics, and Msc in Quality and Productivity and in Computer Science. In the Department of Business Management, students have to prepare a term paper.

(b) There is a provision for optional research projects in Department of Physics and Department of Mathematics.

(c) In the Department of Social Work there is a provision for mandatory field trip.

(d) Research Training Programme organized by Department of Psychology Sponsored by ICSSR.

(3) Lists of M.Sc./M.Ed/MCA/M.Pharm Projects during 2021-2022.

2.7 Evaluation

The Examination Section, in consultation with the University Departments and Colleges draws up an annual plan for holding semester/Internal & end of Semestr (Annual) examinations at the beginning of any academic year, and follows this plan meticulously. The results are announced well in time.

Each of the Papers has a total weighting of 100 marks with 70% set aside for University examinations and 30% for continuous internal assessment consisting of tests, seminars and quizzes. Thus, the examinations in the University comprise of two components: external and internal evaluation. With the introduction of CBCS the University also revised the question paper style. This now comprises of an objective component and a well-balanced unitwise 25% waitage of questions to facilitate the students preparing for examination a question bank for each paper is prepared circulated among the students. The questions set usually require a reasonable amount of knowledge and skills pertaining to a course in a given unit from a student. We have a transparent system of allowing the students to see their marked scripts after every internal test and the examiner concerned takes time to discuss with his/her students the nitty-gritty of evaluation. The provision of blind assessment (the scripts are flapped!), and blind reassessment by teachers outside the university for students on the PG courses, and the teachers of the Postgraduate Department concerned in the University for the undergraduate examinations are made. What is more, there is moderation of assessment at undergraduate level examinations.

2.9 Examination Reforms Unit

The Examination Reforms Unit was established in 1976 in Sardar Patel University and received grants from the UGC until March 1995. It was only then that the State Government began to shoulder the financial burden.

Examination Reforms Unit of the University has a very long history of about 41 years, during which its dynamic conveners along with efficient teams have plunged headlong into implementation of various programmes of examination reforms formulated by the UGC.

CHAPTER-3

RESEARCH, CONSULTANCY AND EXTENSION SERVICES

Consultancy Services

Our Science Departments, Commerce and Management Departments provide consultancy services both paid as well as on honorary and informal basis. The departments within the Humanities and the Social Sciences offer consultations sometimes to the State and national level agencies also on honorary and informal basis. The University and Industry Interaction (U&I Interaction) Cell, established in 2005 to facilitate such consultancy services, often helps to generate revenue largely for the teachers offering consultancy services to the industry with a percentage of it contributed to the university.

The individual departments also offer analytical services to the other academic institutions and industry on chargeable basis and the fund generated is pooled and spent on the materilance of equipments.

Extension Services

Extension services include guest lectures, expert lectures delivered under UGC Teachers' Exchange Programme or UGC Visiting Professors/Fellows Programme, lectures in Orientation Courses and Refresher Courses, and interactions with professional groups like associations or learned societies outside this university.

The Centre for Students Counselling and Placement has been in operation and has been doing excellent work in giving aptitude tests and in arranging for placement. This centre offers career and personal counselling to students.

We have made available, the details of both consultancy and extension services provided by the university teachers in this report.

(4) Ph.D. Programme

University Postgraduate Departments have a strong and vibrant Ph.D. Programme. This programme is integral to our research efforts. The Ph.D. Programme is intended to be a training programme that enables a researcher to work on his/her research independently. University seeks a balance between scholarship and research contribution of a Ph.D. scholar by ensuring that he/she engages in an extensive study in the beginning before embarking on a specific research problem. Our Ph.D. programme has been designed in such a way that any research scholar wishing to pursue further research can choose whether he/she wishes to do it full-time for a minimum of three years or part-time for a minimum of 5 years. A Research Committee in the subject concerned monitors the Ph.D. Programme in each subject. We are happy to report that we have made a provision for an interdisciplinary Ph.D. programme, which is jointly monitored by the Research Committees in the respective subject/s.

In accordance with the guidelines issued by the University Grants Commission, New Delhi, the University has introduced the entrance test and students counselling by the Departmental Research Committee for candidates seeking admission to Ph.D. A course work of 9 credit including course on research methodology in each subject is made compulsory for Ph.D. students in each faculty. The research methodology course for basic Sciences, Social Sciences and Humanities is offered at university level common to all the reported Ph.D. students.

(5) M. Phil. PROGRAMME

The MPhil Programme is offered in some of our Departments. We tend to take our one-year MPhil Programme as a pre-Ph. D. Programme, wherein we train our students in the fundamentals of research including research methodology and help him/her in enhancing his/her scholastic level necessary for completing the Ph. D. Programme. Our MPhil Programme, together with projects and dissertations, constitutes for us the link between Teaching and Research with regard to our students.

In accordance with the guidelines issued by the University Grants Commission, New Delhi, the University has introduced the entrance test and students counselling by the Departmental Research committee for candidates seeking admission to M.Phil.

3.3 Research Collaborations in Progress

A very important aspect of our research effort is a strong collaborative research programme. The faculties have succeeded in developing collaborative research with academics in India and abroad resulting in the publication of joint research papers, operating collaborative research projects, joint organization of various academic programmes, faculty visits and so on. This is through e-mail facility followed by faculty visits.

Interdepartmental Collaboration

There is also interdepartmental collaborative research among Departments in Humanities and Social Sciences as well as among some Departments in Sciences. These include research amongst (a) Departments of Chemistry and Biosciences, (b) Departments of Materials Science and Chemistry, (c) Departments of Biosciences and Mathematics, (d) Departments of Mathematics and Chemistry, (e) Departments of Languages, (f) Departments of Computer Science and Technology and Biosciences, (g) Department of Economics and Agro-Economic Research Centre, (h) Departments of Home Science and Biosciences, (i) Departments of Materials Science and Biosciences and (j) Departments of Physics and Materials Science. The Department of Materials Science has also developed collaborations with GCET College, BVM Engineering College, SVNIT, Surat and LD Engineering College. of course, all Departments converge in the activities of the Community Science Centre.

Accepting a concrete outcome like publication of papers, research projects, patents, organization of an academic programme as criteria for research collaboration, the following table describes the research collaborations in progress during the present year:

The following Table offers a bird's eye view of the research collaborations in progress in the year under review:

CHAPTER– 4

INFRASTRUCTURE AND LEARNING RESOURCES

We have been able to create and utilize good learning resources. Money has never been a constraint, thanks to the generous funding made available by the UGC and the State Government from time to time. We have been able to strengthen our libraries with the latest books in each and every subject-discipline. We have paid heed to the need of computer literacy and the use of computers as a learning resource. Thanks to the UGC and the Government of India initiatives, we have access to a variety of subject-specific journals through INFLIBNET and other sources. Internet connectivity with high bandwidth is available to all teachers in the University as well as to learners and research scholars in our libraries.

4.1 The Uses of Computers as a Learning Resource in the University are Manifold.

- 1 **Computers and Computing:** We use the computers as office automation tool for data management, data mining, and research. The basic use of computers is being taught in all the departments
- 2 **Internet Connectivity:** The University has provided Internet connectivity to all Postgraduate Departments with sufficient nodes. Postgraduate students and PhD scholars are encouraged to use this facility. Effective use of the Internet for literature search and E-transfer of data is greatly helping students and researchers alike in preparations for seminars, designing research and project proposals, updating and refining their dissertations and theses, and electronically communicating and managing their research papers. Over and above all this, it has become an extraordinary powerful means of establishing and maintaining academic contact and information exchange with other workers and peers, greatly enhancing research effort. In many cases, this had led to joint publications of research papers.
- 3 **Training for freeware:** The University has begun to train students for the effective use of relevant freeware. The use of the technical software Latex is taught to PhD scholars in the University Departments of Mathematics, Statistics, and Physics with a view to equipping them with the necessary skills to be able to prepare technical material.
- 4 **Training in specialized software:** Relevant computer courses with practical training on computers are offered in many departments. Besides computer programming course of varying degrees of sophistication. We also include training to the students in effective use of readily available specific software like MATLAB and MATHEMATICA in Mathematics, SPSS in Statistics, SOUL in Library Science etc.
- 5 **Analytical ability:** Teaching of courses like Computers and Statistical methods in the Department of Biosciences, Department of Home Science and Departments of Social Sciences helps learners acquire important analytical ability for experimental studies as well as enable them to use many modern scientific equipment with which computers remain attached effectively in modern times.

- 6 **Software Development:** The Department of Computer Science and Technology trains students in the design and development of software.
- 7 **Computers as teaching aid:** We use computers as an effective teaching aid. We encourage the use of multimedia tools in classroom teaching. A section of the members of faculty in some departments have succeeded in designing software to meet their needs: to prepare their PowerPoint presentation slides; to facilitate classroom teaching; and to keep assignments as well as reading materials on servers so that soft copies can be accessed through workstations. Most departments have software tools required for developing computer-aided teaching-learning materials.

Major Research Activities:

The Centre undertakes the research projects on the important topics suggested/assigned by the Directorate of Economics and Statistics, Dept of Agriculture and Cooperation, Ministry of Agriculture, Government of India, New Delhi. Some of the research projects are undertaken by the Centre on the recommendation of State Governments of Gujarat and Rajasthan as well as other public agencies. Since 1970, the Centre has been also organizing the work of *Comprehensive Scheme to Study Cost of Cultivation of Principal Crops in Gujarat* entrusted to University by the Ministry of Agriculture, Government of India.

Major Achievements:

- Ongoing Research Projects by the Teachers of the Centre during the Year : 11
- Helped/supported many scholars of the University to successfully complete their Ph.D. work in Agricultural Economics.
- Faculty members have been recognized at the State and National Levels.

The Agro-Economic Research Centre (AERC) for the states of Gujarat and Rajasthan was established in July 1961 at Sardar Patel University, Vallabh Vidyanagar by the Directorate of Economics and Statistics (DES), Ministry of Agriculture (MOA), Government of India (GOI), New Delhi. Late Shri H M Patel (ICS Retd) who provided the vision for establishing such an Institute and ensured the much needed support and encouragement for its growth at Vallabh Vidyanagar. AERC has been working as an associate institution of Sardar Patel University and enjoying autonomy status in its working. The Centre has completed 60 glorious years (1961-2021) of its journey marked by both achievements and challenges. During these years, the Centre has emerged as a strong policy feedback centre of the Ministry of Agriculture, Government of India due to hard work and strong commitment of the staff in the Centre. The focus of research effort in the initial stage was on comprehensive village surveys and resurveys in order to understand the process and direction of change at the village level. Subsequently, the emphasis of research has shifted to problem oriented studies. Most of these research projects have been taken up by Centre on the recommendation of the Government of India and State Governments of Gujarat and Rajasthan. Some of the projects have also been sponsored by other national and international organizations. During its long journey, the Centre has brought remarkable improvement in every aspect of research including methodological base of the studies. The studies have come out with useful findings and policy implications for agricultural and rural development of the states of Gujarat and Rajasthan. Many seminars and conferences were organized by the Centre (jointly with PG Department of Economics of our University) during these years. Since 1970, the Centre has been also organizing the work of *Comprehensive Scheme to Study Cost of Cultivation of Principal Crops in Gujarat* entrusted to University by the Ministry of Agriculture, Government of India.

The principle objectives of the Centre are as follows:

- 1) To make continuous study of the change in rural economy by means of surveys of villages each year, to be repeated after an interval of five years.
- 2) To conduct ad-hoc investigation on problems of interest to the Ministry of Agriculture and Irrigation and the State Governments under their jurisdiction.
- 3) To undertake research on fundamental problems relating to the agricultural economy of the country.
- 4) To give technical advice to the Government of India and to the State Governments on such important issues as, with mutual agreement, may be referred to the Centre.

(iii) Up gradation and Computerization Facility:

As the advent of Computers, we have restricted the old Hand Compose and Letterpress Printing Process, up to certain level. Receipts with numbering and only very small run jobs are executed through letterpress printing. Rest of the jobs have been routed through Computerized Type Setting-DTP work or Designing and Printed with Screen Printing or Offset Printing process according to nature of the job. Multi Colour-Four Colour Offset jobs are designed on computer and then C-t-P (Computer-to-Plate) is taken out and Four Colour Offset Printing is outsourced.

The same way, the isolated Examination Unit of University Press has also been made fully computerized. Question papers are typed/entered and set on Computers, and then after proof reading printed on High Speed Copy Printer machines.

Thus, adopting Computerization the process has become easier and speedy, comparing to manual hand composing.

(iv) SECURITY:

CCTV System in Examination Unit of University Press has set up highest standard of security, so that secrecy is maintained in every block of Examination Unit i.e. Entry Point, Computer Unit, Printing Unit, Block wise Unit and Proof Reading Hall.

A Security Guard is kept engaged amongst University Press, Bhaikaka Library and Home-science Department. Security is strengthened more, while the numbers of question papers are more, by engaging more security guards. Entry Register is maintained with Entry and Exit time along with initials of Senior Press Supervisors, Proof Readers and Distributors. Employees, who are engaged in examination work, are detained up to the next half hour of examinations starting time; and muster is maintained for the same with Name, Time of Entry and Exit and Signature.

STUDENT SUPPORT AND PROGRESSION

Students' support in an urban university like ours is available in various forms. The localized nature of students profile is an outcome of Policy of the Government of Gujarat which stipulates that 87% seats in the grant-in-aid institutions be reserved for students of the same university, and compliance with the general reservation policy of the Government. Our students like underprivileged/disadvantaged classes of society viz., SC/ST/OBC and women are able to avail of scholarships given by the state and other agencies. The university has made provision on its self-finance courses to pay 10% of our students' free studentship to the extent of 50%. CHAPTER – 6

ORGANIZATION AND MANAGEMENT

The university has a long-standing tradition of leadership in all walks of academic as well as administrative life. Thanks to the tall academic leaders we have had in the form of Vice Chancellors like Shri Bhailalbhai Dyabhai Patel, Shri Babubhai J Patel, Professor R S Mehta, Professor R D Patel, Professor P J Patel, Professor B G Patel, Professor Harish Padh and at Present Professor Shirish R Kulkarni, Faculty in the university have remained motivated and have been working towards developing higher standards of achievement. Gujaratis settled abroad or Non-resident Gujaratis, who form a part of the Indian Diaspora, contribute innovative ideas of management and quite often make donations to the university. This University is well-known in the world today due at least to two major reasons: the association of the name of the great son of the soil, Shri Sardar Patel, with it; and the contribution of the teaching fraternity in the University.

We are an affiliating university catering to the needs of approximately 50,000 students distributed in 11 faculties in more than 148 affiliated colleges. The large number of students in the university has indeed posed problems to the administration due to inadequate staffing in academic and administrative sections. The university leadership has been successful to persuade the state government to issue no objection certificates so that it can fill the vacancies that have remained unfilled for a long time and also new additional positions are sanctioned.

Major statutory academic bodies of the university include Boards of Studies, Faculties, Board of Postgraduate Studies and Research, Academic Council, the Senate, and the Executive Council. Each of these bodies considers proposals, discusses them at length and decides on policy before passing the proposals on to the next higher body. Consequently, quality is perceived and pursued naturally, without wasting time and energy in mere discussion. The official interactions between the administrative and academic units are bilaterally gainful for making the functioning more effective and efficient both ways in quite an amicable manner. Administrative sections and their intersectional communications make the whole system goal-oriented.

6.2 University Finance

The operating budget of the institutions is adequate to cover their day-to-day expenditure. Notwithstanding the fact that the State Government sometimes fails in releasing the adequate monthly grant in time, which creates pressure on the fiscal resources of the University. The pressure is eased using the funds available from the self-financing programmes and courses. The maintenance budget of the University is insufficient with reference to its assets, mainly because the Government, though based on value estimated three years ago, provides only 3% of the book value of the assets. The University accounts have been audited regularly, and a mechanism has been established for internal as well as external audit.

Three initiatives have been undertaken to ensure proper financial management in the University. (1) The University appointed a High-Powered Committee in 2003-04 to coordinate and streamline the financial aspects of the Postgraduate Departments as well as the Administrative Unit, and its recommendations have been implemented. (2) An Internal Auditor, who is a qualified chartered accountant, audits and approves each bill prior to payments being made, and then puts up the monthly report before competent authorities of the University. (3) The Executive Council has also appointed a Financial Advisory Committee for overseeing fiscal management and providing guidelines to ensure that the financial health of the University is maintained.

SYSTEMS OF ACCOUNTS

1. Maintenance Accounts (Non-Plan), dealing with revenue receipts and expenditure of the university.
2. Development Account (UGC Plan), dealing with the development of the university. The expenditure is being met out of the five-year plan.
3. Earmarked (Specific) and Endowment Funds, dealing with the transactions in connection with the earmarked research projects and awarding scholarships and medals. Conferences and other specified purposes are funded by various agencies namely UGC, DST, DAE, CSIR, NBHM, DRDL, ICAR, NDDB, State Governments etc.
4. Self Financed Courses: Separate accounts are maintained and expenses are being met from the resources.
5. Debt, Funds and Deposits relate to the receipts and payments in connection with the Provident Fund and other various receipts.

CHAPTER-7

HEALTHY/INNOVATIVE PRACTICES

NAAC used the phrase 'Best Practices' for a long time before shifting to the alternatives 'Healthy Practices' and 'Innovative Practices'. All these terms may be synonymous but as it happens with synonyms wherein words share something in common but differ in great degree in meaning, these terms also differ. The term *best practice* is certainly a reference to performance vis-à-vis activities indicative of a habit aimed at improvement of a skill or a skills set. The term *healthy practice* signals a practice that has, shows, or promotes positivity in the overall performance. Healthy practice is one which indicates that the activity or a set of activities provide us evidence of the institution being in good health. The term *innovative practice* indicates activity or a set of activities being performed indicate uniqueness, or suggestive of these set of activities being matchless and, therefore, superior in nature.

Some of the healthy/innovative practices we have been able to put in place and follow very meticulously as a continuum are as follows:

1. The University township in general and the University campus in particular abounds in trees of all kinds and this has helped reduce pollution a great deal and maintain temperatures at 2 to 3 % lower than what these actually are outside the campus and township especially in hot summer. This also adds to the ambience of the place.
2. The Vallabh Vidyanagar Municipal Borough and the University ensures that new trees are planted in place of those that may have dried up. There is a near complete ban imposed on felling of trees on the campus and in the township. This practice ensured the presence of highest density of trees per km in Gujarat.
3. Our Internal Quality Assurance Cell (IQAC), which was created in the year 2000 to work on the SSR for the assessment and accreditation for the first time in December that year, was formalised in 2004. Subsequently, it was reconstituted in 2006, 2009 and 2015 to start preparing the SSR for reaccreditation. It has worked in tandem with the Examination Reforms Unit (ERU) of the University. These two units have kept a watchful eye on and addressed the academic and examination related issues from time to time.
4. Our successive Vice Chancellors have made themselves accessible and available to the student community throughout the year, depending on the nature of their daily schedule.
5. Admission Process for U.G. & P.G. is centralised and it is done online. Student can fill his/her admission form anywhere through University portal. Admission is allotted based on his/her merit & Admission is issued to the student based on the student's choice. He/She can select College/Department & get the admission. The admission process is student friendly & transparent.

There is complete transparency in admissions granted on the basis of merit as the merit list for the masters, MPhil and PhD programmes is prepared and put on the University website. The university has adhered to the national and state reservation policies in granting of admissions. Students from communities belonging to Schedule Castes, Schedule Tribes, Socially and Economically Backward Classes, Physically or Visually Challenged groups, children of retired army men and women etc are admitted on merit against their reserved quota and, therefore, there have been no complaints of discrimination. The M.Phil and Ph.D. Entrance Test are conducted centrally.

6. The university departments work in close cooperation with each other and this ensures work getting done quickly. Everyone in the university departments knows everyone else in the

- administration, and this has facilitated a happy co-existence. Interdisciplinary and multidisciplinary teaching and researches are encouraged and are in practice.
7. The university takes pride in the fact that we have never had strikes on the campus. Academic sessions begin every year on time, examinations are announced and conducted on time, and central evaluation is conducted and results declared on time. Complete confidentiality is observed in on-the-spot evaluation and resolution of the problem/s.
 8. 10% of the meritorious students admitted on self-financing basis are granted 50% free ship on the basis of their merit standing at the Bachelors for those in the first year of the two-year masters programme and during the second year on the basis of their performance in the examination in the first year of masters programme. This works as a great incentive, and motivates our students to compete so as to be eligible for the 50% freeship.
 9. Students receiving gold medals for their outstanding performance in their final year exams are invited a day before the annual convocation, publicly felicitated in the presence of their parents, the teaching fraternity, administrative staff, and leading citizens of the township specially invited for the purpose, and this ends with a dinner engagement where they get to interact with everyone present.
 10. The university disburses gratuity and leave encashment fully by cheque to its superannuating employees on the day of their retirement.
 11. Employees retiring during any given academic year are publicly felicitated and given a warm farewell as a result of which a permanent bond gets at once established between the university and the retiring employees, creating a lot of goodwill.
 12. Medical facilities available in the University Health Centre continue to be extended to the superannuating employees and their families.
 13. The University has been implementing the earn while learn programme to the students.

Details of other Support systems:

7.1 Internal Quality Assurance Cell (IQAC)

Educational institutions established by the state and funded from the public exchequer for 'public good' are required to lead to improved quality of the services they offer. These academic institutions are increasingly recasting themselves on business models. For, the increased concern for accountability and transparency is virtually leading to their corporatization, resulting in demands for accountability to stakeholders, quality assurance, quality management, and Total Quality Management (TQM).

Internal Quality Assurance Cell was formally established in May 2004 after the first accreditation of our university. In keeping with our policy of paying greater attention to quality aspects to make Quality Consciousness an intrinsic part of the academic and administrative fabric in the University, we set up an IQAC. Its twin objectives are: (a) to ensure continuous improvement in the entire operation of the institution; and (b) to assure the stakeholders in higher education - namely, students, parents, teachers, staff, would-be employers, funding agencies and society in general of the accountability of the institution for its own quality and probity. It functions under the guidance of a Quality Advisory Committee (QAC) chaired by the Vice Chancellor.

The IQAC is mandated to perform the following functions: (1) to develop and apply quality benchmarks/parameters to various activities of the institution; (2) to disseminate information

on quality aspects; (3) to organize discussions, workshops, seminars and promote quality circles; (4) to record and monitor quality measures of the institution; (5) to act as a nodal agency of the institution for quality related activities; (6) To collect, analysis and act upon the feedback of the stake holders, chiefly the students and (7) to prepare the Annual Quality Assurance Report and such other reports as may be required from time to time.

Objectives of IQAC

1.	To ensure timely, efficient and progressive performance of academic, administrative and financial tasks
2.	To enhance the quality of academic and research programmes by making them relevant
3.	To create mechanisms so as to ensure equitable access to and affordability of academic programmes for various sections of society.
4.	To optimize and integrate modern methods of teaching and learning into the existing designs of the programme on offer.
5.	To create mechanisms for the improving the credibility of evaluation procedures
6.	To ensure adequacy, maintenance and functioning of the support structure and services
7.	To engage in sharing research and networking with other institutions in India and abroad.
8.	To integrate various activities of the institution.
9.	To channelize the interdisciplinary work by facilitating faculty members.

How Our IQAC Stands

CHAPTER-8

LOOKING AHEAD

The National Education Policy 2020 (NEP 2020) has turned out to be a major force in changing the landscape of higher education in India. The higher education institutions across India are gearing up for its effective implementation by incorporating all the elements of the policy. Sardar Patel University is also marching ahead in this direction and has established NEP Cell for effective implementation of the policy. SPU is looking forward to focus on the key points of the NEP 2020.

- *Multidisciplinary/Interdisciplinary Education:* Looking at the wide scope for amalgamation of traditional subjects into multi-disciplinary areas of teaching and research, interdisciplinary/multidisciplinary elective courses will be introduced in each program. The elective courses can be taken up by the students of two or more different programs offered by different departments. To promote multidisciplinary research, provisions will be made in the university PhD regulations to reserve 10% seats over and above the existing intake.
- *Academic Bank of Credit (ABC):* One of the most important features for the successful implementation of NEP-2020 is the ABC. It is crucial for establishing a flexibility of interdisciplinary/ multidisciplinary academic mobility of students across HEIs in India. SPU has already registered for ABC and the registration of the students is in progress. Registration of all the university students is the target for the next year.
- *Skill Development & Integration of Indian Knowledge System :* Skill development has been an integral component of the curricula of the programmes offered at university. During implementation of NEP-2020, new skill-based courses will be incorporated in the curricula of the programmes. Also, value-added certificate courses in different disciplines of knowledge based on the Indian knowledge system such as yoga, Indic philosophy, Vedic mathematics, Hindu studies etc. will be introduced. UGC-HRDC-SPU has planned different certificate courses like Stress Management, Health and Well-being and, workshops on Promotion of Indian Knowledge System, cultural values and Indian Education System in the academic calendar of 2022-23.
- *Online Education:* Student participation in MOOCs through SWAYAM and other platforms will be encouraged. A policy will be framed for the choices of courses that the students can opt and earn credits towards completion of the requirement for the degree as per NEP. To facilitate the teachers of the university to design and develop courses for online platforms, an audio-visual recording facility is being established for the digital content development.

For the reinforcement and enrichment of the research, consultancy and extension ecosystem, the university has a multi-pronged plan of action. Some of the important points are:

- *Research and Development Cell (RDC)* is being established as a nodal center for the coordination among various academic and administrative organs of the University for the matters related to research. RDC will coordinate and undertake the activities to

promote and facilitate multidisciplinary/interdisciplinary research and consultancy among the faculties and the research scholars. Awareness and sensitization programs for the students and faculties will be organized to increase the extra-mural research funding from the government and non-government funding agencies.

- *PhD facilitation center* is being established from the grant of Government of Gujarat.
- *Student Startup and Innovation Program (SSIP)* :The university has received a grant of Rs. 3 crore from Govt of Gujarat under SSIP 2.0. Efforts will be made for its effective implementation and utilization of the grant for the fulfillment of the stated objectives.
- *University Industry Interaction Cell (UIIC)* policy for research and consultancy will be reviewed and revised considering the feedback from the stakeholders. An information booklet about the facilities and expertise available at the university for research, consultancy and analytical services will be prepared and published for better interfacing with the industries and other stakeholders. An academia-industry meet will be organized to enhance the engagement between the two stakeholders in the areas of student internship, placements, industry-sponsored research projects etc.
- New MoUs with other educational and professional organizations at local, state, national and international level. Effective fictionalization of the existing MoUs

Intellectual Properties Rights (IPR) policy will be framed to promote and facilitate the students and faculties for copyrights and patents.

64th Annual Convocation

Sunday, 26th December, 2021

CONVOCATION ADDRESS

Chief Guest

Dr. Vinay Sahasrabuddhe,
President,

Indian Council for Cultural Relations (ICCR), New Delhi

At the outset, let me express my deep sense of gratitude towards the entire leadership of Sardar Patel University, a university, of the educators, for the educators and by the educators. Let me also extend hearty congratulations to all those who have got their degrees today and also those distinguished students who have won prizes for their meritorious academic performance.

Friends, this is a convocation which traditionally we used to refer to as Deekshant Samarambh. From now onwards you are all Deekshits, that is persons who have been acquired knowledge and accepted the responsibility that comes with the knowledge. Acquiring knowledge is a humbling experience because the more you learn, the more you learn how less you have learnt. Learning is always endless. It makes one understand the very purpose of Human Life. Education, according to S Radhakrishnan, is **acquiring of knowledge beyond** what is academic and professional. Education is the assimilation of values and ideas for character building and preparing to face life's challenges.

India has essentially been a knowledge society since times immemorial. But today, we have become the third largest source country in so far as the number of students going abroad is concerned. When it comes to making India a global destination for higher education, we cannot forget the fact that India stands at 26th position as a destination for higher education. If we have to establish that we still continue to be a knowledge society, we will have to work towards three basic things. Firstly, understanding our own potential as knowledge society and making the world understand our knowledge potential. Secondly, we have to undertake special efforts to ensure that India attracts huge number of foreign students and thirdly, we have to work hard towards building great institutions, that can match Hugh ranking institutions recognised globally.

When it comes to understanding our own potential, the strongest hurdle is our one ignorance about ourselves and our culture, and more dangerous to this, our inexplicably serious contempt towards our cultural and linguistic identities. Journalist and commentator Thomas Friedman has written a wonderful book titled 'The World is Flat'. This flattening of the world has happened because the so-called super powers of the world made us believe that whatever is indigenous is inferior. The world today finds itself in the grip of Americanisation, the process of which starts with a superiority complex that is inadvertently attached to the use of English language. In the case of India, the process of suppressing indigenous languages started in early 19th century. We are all aware of the designs of Lord Macaulay who had openly said in his minutes that we want 'interpreters between us and the millions whom we govern, a class of persons Indians in blood and colour but English in taste, in opinions, words and intellect.' This colonial game plan was very obvious but unfortunately, we chose to ignore the same. In

his seminal work, 'Modern Religious Movements in India' J N Farquhar has very elaborately mentioned how indigenous languages, as per this game plan; were treated by the British in early 1830s. He says 'The New Education Policy of the Govt created during these years, the modern educated class of India. These are men who think and speak in English habitually, who are devoted to English literature and whose intellectual life has been almost entirely formed by the thoughts of the West. Large numbers of them enter Govt service while the rest practise law, medicine or teaching or take to journalism or business.' Now, happily the New Education Policy unveiled by the Govt under the leadership of PM Narendra Modi has rightly emphasised on making Indian languages, medium of knowledge dissemination. If one can learn medicine in Russia or Armenia in Russian or Armenian language, why cannot we learn the same in Gujarati or Kannada or Marathi? Nobody needs to be against English language per se, but how can we discount the fact that language is a vehicle of culture and lifestyles. In English, they say 'apple a day, keeps the doctor away'. If we blindly follow this advice which is climate specific, simply because the language brings it to us, I am afraid the doctor will visit us frequently as eating apple everyday may not suit climatic conditions elsewhere. Hence, English in India will also have to evolve with an Indian flavour. And when it comes to Indian languages, if we don't strengthen them, enrich them further by making it a medium of our day-to-day communication that else will? Also, it is for all of us in India to make speaking in our languages a matter of prestige. We must be proficient in any language that we speak. English is an important language but that doesn't mean those who cannot speak good English or even good Hindi are second class citizens. If we speak our mother tongue well, I am sure we can befriend with other tongue very effectively. Respecting mother tongue just as we respect our mother is something about which we cannot and should not compromise.

Now, the other most important question is how we make India a global hub of higher education. India has an inspirational history of Nalanda, Takshashila and Vikramashila that served as the melting pot of scholars from across the world. Though we are far from those glory days, Indian education system is on its way to reconstruct itself. The government has embarked on several initiatives aimed at attracting a large cohort of foreign scholars to study in Indian universities, enriching our system through ideas and diversity.

From Bangladesh premier Shaikh Hasina to Aung San Suu Kyi and other leaders in public life in several Asian and African countries, who have studied in India speak endearingly about their experiences as students in India. However, statistics about countries attracting more foreign students explains us the nature of the challenge before us. According to reliable studies, India is the 26th destination country whereas it is the 3rd largest source country of students desirous of studying abroad. Over 7.5 lakh Indian students study abroad and unless we try to bring this number down by making Indian institutions more attractive in every possible way, our efforts to make India a global destination will not be adequately effective.

We all have to realise the overall and multi-dimensional importance of India becoming a hub of higher education. Our efforts, in this process would add great value to our academic institutional establishments as per the global standards of knowledge era. We also would be hugely adding to our soft power potential. Efforts also needed from within India and from abroad. Influencing global educational opinion- making, forms a critical part of our agenda.

India becoming a Vishwa Guru is an attractive proposition. But for that, Herculean efforts with are needed on at least two fronts: firstly, Restructuring Academic Courses and secondly Building New Institutions of global standards as also strengthening old and existing institutions and making them globally competitive.

It would be a good idea to evolve a new category of academic courses as International Courses where there are stringent rules and regulations pertaining to content as well as conduct of courses, instructional methodology and overall assessment to move closer to the global benchmarking. Such courses could be across many Universities and agencies like NAAC or UGC can evaluate them and accord the status of an International Course. Such courses could be conducted only at certain Universities and Institutions that are earmarked, with the help of NAAC and UGC as Institutes Recommended for International Students (IRIS)? These IRIS Institutions will be mandated to maintain a particular standard of academic courses, appoint counsellors for foreign students, have ability to showcase their institution as an attractive destination abroad as also that already have adequate infrastructural facilities to take care of logistical needs.

Should there be a consensus on this we can also establish an Indian Network of International Education (INIE) with participation of all IRIS institutions, partner institutions from abroad and institutes or organisations like ICCR and UGC, AICTE etc.

One must remember that international students will be looking for a certain value addition that learning in India may bring to them. Such value addition can happen if we also offer some incentive in the form of short courses in Traditional Indian Knowledge Systems (TIKS). Such courses may include subjects like Veda, Upnishads, Bharat Natyam or similar classical dances and classical music, Ayurveda and Yog etc. When world over experiments in multiculturalism are being undertaken with partial success, India provides a solution through our basic civilisational values of spiritual democracy, where Ekam Sat Vipra Bahuda Vadanti is the fundamental principle.

However, for all this to happen we need academic institutions of global standards. To that end, cultivating a scientific approach towards the process of institution building is extremely important. In our country persons like Pt Madan Mohan Malviya and Vikram Sarabhai are known as great institution builders. Strong motivation, stronger efforts and strongest commitment are the three essential ingredients of the process of institution building. Also needed is a no-nonsense professional approach in decision making. Institutional leaders with futuristic vision, free from myopia alone can set healthy precedents in any institutional life and that alone is the key to rule based institutional governance. Very unfortunately, more often than not; our private institutions are seen as family-owned businesses and public institutions are considered as owned by all and as result owned by none. Universities and colleges need leaders with a clear vision, a sense of mission and committed to build a true institution.

We have to remember that people have different expectations from educators, editors, thinkers and even artistes. What people expect from these is markedly different from their expectations from, say; bankers, industrialists or traders. This is because the people in the first category often give advice, deliver sermons or preach unlike those in the second category. Obviously then, people expect from educators, politicians and journalists that they will Practice what they preach. In the absence of this, people are smart enough to see an element of hypocrisy leading to contempt. If we have to avoid this, educational institutions, whether public or private; would do well committing themselves to a set of values and adopting a code of transparency and accountability.

The time you spent in this institution of higher learning is preparatory time. This reminds me of the Chinese bamboo. If you plant the seeds of Chinese Bamboo, you don't see any growth for as many as five years. Then suddenly one fine day, you see a little sprout. In the next six weeks the plant grows to a height of 90 feet. Therefore, the time that you spent here is time well spent.

I understand that you are also anxious about your future. You must be thinking of "What next?" In this regard, I would like to assure you that opportunities for you are plenty. Globalization has brought many international and multinational companies to our door step. You must understand the need and requirements of your prospective employers and try meet those demands. John Maxwell, a well-known American author once said "The illiterate of the future is not those who cannot read or write, but those who cannot learn, unlearn, and relearn."

Finally, I am extremely happy that I could be with you in this joyous occasion. The degree that you have earned today is going to be with you lifelong. The knowledge you have gained will serve you lifelong. The experience that you have gained will be remembered by you lifelong. I wish you the best of everything in life.

Lastly, every institution needs a foundational philosophy, which is its Adhishthana, a Karta, who leads from the front, a variety of academic projects and programmes, and efforts in very many ways to achieve the institutional objective of excellence.

As Shrimad Bhagwat Geeta says —
