

**SARDAR PATEL UNIVERSITY**  
**Programme: B.Sc (Information Technology)**  
**Semester: VI**  
**Syllabus with effect from: November - 2013**

<b>Paper Code: US06CINT02</b>	<b>Total Credit: 3</b>
<b>Title of Paper: Web Application Development Using PHP</b>	

<b>Unit</b>	<b>Description in detail</b>	<b>Weightage (%)</b>
I	<p><b>Basics of PHP and Control Structures</b></p> <p>Introduction to PHP, Advantages of PHP, Basic PHP Syntax.</p> <p>Variable in PHP.</p> <p>GET Method.</p> <p>POST Method.</p> <p>PHP Operators.</p> <p>Arithmetic, Increment/decrement.</p> <p>Assignment, Comparison, Logical.</p> <p>Ternary, String.</p> <p>Control Structures.</p> <p>if Statement, If...else, Elseif.</p> <p>switch, while, do-while.</p> <p>for, foreach.</p> <p>break, continue.</p>	25%
II	<p><b>Array and Functions.</b></p> <p>Array.</p> <p>Array Functions :</p> <p>( List, is_array, count, sizeof, in_array, current, next, prev, end, each, array_walk, Sort, rsort, array_merge, array_combine, array_values, array_reverse, array_push, array_pop ).</p> <p>User Define Functions.</p> <p>Function arguments.</p> <p>Default argument values.</p> <p>Variable-length argument lists.</p> <p>Returning values.</p> <p>Variable functions</p>	25%
III	<p><b>Miscellaneous Functions, Session and Cookies.</b></p> <p>String Functions :</p> <p>(chr, strtolower, strtoupper, ucfirst, ucwords, strlen, substr, strcmp, strcasecmp, substr_count, str_replace, strrev).</p> <p>Maths Functions :</p> <p>(abs, ceil, floor, fmod, min, pow, sqrt, exp, rand, bindec, octdec, hexdec, decbin, decoct, dechex).</p> <p>Date/Time Functions :</p> <p>(date, getdate, checkdate, time, localtime).</p> <p>File Functions :</p> <p>( fopen, fread, fwrite, fclose, file_exists, is_readable, is_writable, fgets, fgetc, file, file_get_contents, file_put_contents, ftell, fseek, copy, rename, filesize, filetype ).</p> <p>Session.</p> <p>Cookies.</p>	25%

IV	<b>My SQL Functions</b> Introduction to MySQL. Installing MySQL. MySQL user Administration. PHP Myadmin. MySQL Data types. Connecting to MySQL. mysql_connect, mysql_close, mysql_select_db. MySQL Queries. mysql_query ( create, insert, select, update, delete ). mysql_list_dbs, mysql_list_tables. mysql_list_fields, mysql_free_result. Fetching Data. mysql_num_rows, mysql_affected_rows. mysql_fetch_array, mysql_fetch_row. mysql_fetch_object, mysql_num_fields. mysql_fetch_field, mysql_field_name. mysql_field_type, mysql_field_len. mysql_field_table, mysql_errno, mysql_error.	25%
