12. I was surprised at what they proposed to do.  
(state whether it is complex or compound sentence)

①

(PTO)

It is a great pity that we do not try to store sunlight so that we may use it as we need it. We will no doubt learn to do this someday. Meanwhile, the green world around us is storing sunlight. There is stored sunlight in coal. The coal is made from the bodies of plants that lived long ago. These plants have lived by sunlight and turned the power of sunlight into the making of their own bodies. That power is still in the coal as we find when we burn it. The light of the fire is due to sunlight that fell on the earth millions of years ago. Everyone who plants a tree is storing sunlight. Some day when everyone becomes sensible we shall not waste great tracts of land as we do now.

- i. Why should we store sunlight?
- ii. How is coal made?
- iii. How does nature help us store energy?
- iv. Why should everyone plant tree?
- v. Give a suitable title to the passage.

Or

B. Make a précis of the following passage:

It is easy to say, 'Enlarge your vocabulary; first, that you may enter upon the privileges of a cultivate woman; and secondly, that you may be able to tell the truth easily and accurately.' But it is another and more difficult matter to prescribe the means by which this is to be done. Every girl must, to a large degree, work out her own method. The reading of the best books and conversation with cultivated folk are both helps to the free use of words. The dictionary is the best friend for your task. Never allow a strange word to pass unchallenged. Usually, it is wise to look it up at the moment. If that is impossible, it must be written firmly on the memory and traced at the first opportunity. It is good to encourage in yourself the habit of dawdling a little over the dictionary. It is the only place where dawdling reaps a harvest. To learn two new words a day-thoroughly to learn them so that their use will not have a foreign accent-is to insure a large vocabulary before you reach middle age.
