- 3) Mahatma Gandhi
- 4) Protection of rivers.

**Q-5** Read the following passage and answer the questions given below. (15)

It is a great pity that we do not try to store sun light so that we may use it as we need. We will no doubt learn to do this someday. Mean while, the green world around us is storing sun light. There is stored sun light in coal. The coal is made from the bodies of plants that lived long ago. These plants have lived by sun light and turned the power of sun light into the making of their own bodies. That power is still in the coal as we find when we burn it. The light of the fire is due to sun light that fell on the earth millions of years ago. Everyone who plants a tree is storing sun light. Some day when every one becomes sensible we shall not waste great tracts of land as we do now.

**Questions :**

- 1) Why should we store sun light ?
- 2) How is coal made ?
- 3) How does nature help us store sun light ?
- 4) How does the plants use the sun light ?
- 5) What is the source of light of fire ?

**Q-6A.** Fill in the blanks with appropriate modal - auxiliaries given in the brackets.

(Any Six)
