Maximum Marks: 70

CP.T.O.)

## **Sardar Patel University**

B.Sc. Semester – IV Examination (NC 2010 Batch)

Time: 10.00 to 1.00 P.M

Thursday, 12th April, 2018

Course code: US04CSTA01

(Statistical Techniques)

	•		(Statis	ilicai reciniiqu				
Note: (i)	Graph paper will be p	rovided on requ	est ( <i>ii</i> ) Q.3 to 0	Q.8 each sub qu	estion has 4 ma	ırks.		
					,			$(10 \times 1)$
	With reference to SO	the probabilit	v that any point	lie on either sid	le of central lin	e is		
(1) With reference to SQC, the probability that any point lie on either side of central line is  (a) \frac{1}{2}  \text{(b)} \frac{1}{2^2}  \text{(c)} \frac{1}{2^6}  \text{(d) none} \\  (a) \frac{1}{2}  \text{(b)} \frac{1}{2^7}  \text{(c)} \frac{1}{2^6}  \text{(d) none} \\  (a) \frac{1}{2}  \text{(b) Simple average}  \text{(c) Free hand curve}  \text{(d) Semi average} \\ (a) Least square  \text{(b) Simple average}  \text{(c) Free hand curve}  \text{(d) Semi average} \\ (a) Least square  \text{(b) Simple average}  \text{(c) Free hand curve}  \text{(d) None of these} \\ (a) Assignable  \text{(b) Chance}  \text{(c) Random}  \text{(d) None of these} \\ (a) Assignable  \text{(b) Chance}  \text{(c) Random}  \text{(d) None of these} \\ (a) 1.25  \text{(b) 0.36}  \text{(c) 0.45}  \text{(d) 0.6703} \\ (b)  \text{(c) 0.45}  \text{(d) 0.6703} \\ (b)  \text{(a) 1.25}   \text{(b) 0.36}  \

	Net and the uses of	SOC						
	If and or mare noin	ts fall helow I Cl	. in construction	of $p-$ chart, v	vhat would you	conclude from t	natr	
	Write down the no	rmal equations i	for estimating u	nknown consta	nts in the equa	tion Y = a + bX	$+cx^{-}$ .	
Q.3(a)	Obtain normal equ	ations to fit an e	quation of line	Y = a + bX.				
(b)	Fit an equation $Y =$	= $ab^X$ to the dat	a given below:				404	Λ \

1	· <b>v</b>	1.0	1.5	2.0	2.5	3.0	3.5	4.0
	Y	1.1	1.3	1.6	2.0	2.7	3.4	4.1

Estimate Y when X = 4.5

OR

Using least squares method obtain normal equations for estimating unknown constants in the equation  $Y = a + bX + cX^2.$ 

The following table shows literacy rate of India from 1921 to 1961. b)

The tollowing rapid shows life is	icy rate of maia.		,		1011	
Census year (X)	1921	1931	1941	1951	1961	İ
Literacy Rate (Y)	11.4	12.1	13.9	17.3	18.0	
Literacy Nate (1)			<u> </u>		su rata far th	_

Fit an equation of straight line to the data given using least squares method and estimate the literacy rate for the census year 1971 and 1981. Also obtain average annual increase in the literacy rate.

- In usual notation, Prove that  $-1 \leq 
  ho \leq 1$ . Interpret the cases when ho = -1, 1.4(a)
- If X and Y are two independent variables with variances 36 and 16 respectively. Calculate the coefficient of correlation (b) between U and V where U = X + 2Y and V = X - 2Y.

- Write down the properties of correlation coefficient. Prove any one of them. .4(a)
- If X and Y are two independent variables with variances 36 and 16 respectively. Calculate the coefficient of correlation between (b) U and V where U = X + Y and V = X - Y.
- What is regression? Derive the regression equation which could be used to predict X for the given values of Y. .5(a)
- The success of a shopping center can be represented as a function of the distance (in kms) from the center of the population (b) and the number of clients (in hundreds of people) who will visit. The data given in the table below:

i	and the number of cile	iutz (iu unimiens	of beobie) mile			0.4	40
Ī	Distance	15	19	25	23	34	40
		0	7	6	4	2	1
	No. of customers	0				ulating most suit	able statistical n

(i) is there any relationship between these two variables? Justify your answer by calculating most suitable statistical measure and comment on it. (ii) List out the other variables that may affects the value of dependent variable (iii) To receive 1000customers, at what distance from the center of the population should the shopping center be located?

OR

- Do as directed:
  - (i) Prove that if one of the regression coefficient is greater than one than the other one must be less than one.
  - (ii) The tangent of an angle between two regression line is given to be 0.6 and  $S_Y = 2S_X$  then find the correlation coefficient between X and Y.
- The following table consists of one student athlete's time (in minutes) to swim 2000 yards and the student's heart rate (beats (b) per minute) after swimming on a random sample of  $10\,\mathrm{days}$ .

	per minute) atter	SWITHING	gunaran	dom samp			<del></del>			25 27 25 57	i
1	Swim time	34 12	35.72	34.72	34.05	34.13	35.73	36.17	35.57	35.37 35.57	
		144	152	124	140	152	146	128	136	144 148	
	Heart rate	144	102	12-1	4				l deserted of	Linear relationship	'n

- (i) Identify an independent and dependent variable (ii) Does there appear to be any evidence of linear relationship between these two variables? Justify your answer by calculating most suitable statistical measure. (iii) Estimate the heart rate of a student if his swim time is 35.42 minutes.
- Which components of a time-series would you mainly associate each of the following? Why? Q.6(a)
  - (i) A strike in a factory delaying production of a car in a Manesar plant of Maruti Udyog.
  - (ii) Price hike in Gold
  - $\left(iii
    ight)$  Fall in death rate due to advances in Science
  - (i 
    u) The sale of air conditioners increases during summer.
  - From the following data, find the trend values by the method of semi averages. Also, estimate the Facebook users for 2019. (b) Also find average monthly increase in the users.

Number of Facebook users in India from 2011 to 2018 (In Millions)

		N:	umber of Fac	cebook user:	s in ingla tro	M SOTT IO 5	OTO (III IAIIIII	<del></del>		ı
Į			2012	2013	2014	2015	2016	2017	2018	
ĺ	Year	2011	2012	2013		5.45.50	254.02	277.95	291.5	٦
1	Freshand Hoore	135.6	165.57	194.11	219.94	242.53	261.83	2/7.93		J
	Facebook Users	1,55.0			L	<u></u>				

What is time series? State its importance. Why do we analyze time series?

(b) Population of India (1911 - 1971) as follows:

Q.7

Year (t)	1911	1921	1931	1941	1951	1961	1971
Population (in crores)	25.0	25.1	27.9	31.9	36.1	43.9	54.7

Fit a straight line trend to the above data by the method of least squares and find the trend values. Estimate the population for

Q.7 The following table represents the no. of books issued in a college library on 5 working days for a period of 4 weeks. Calculate the daily trend values using least square method.

	No. of books issued									
Week	Mon	Tue	Wed	Thu	Fri					
1	25	43	44	46	51					
. 2	18	34	52	49	53					
3	12	25	48	51	62					
4	19	22	49	61	71					

OR

Calculate the quarterly seasonal indices using ratio to moving average method.

			Sale	Sale of Cars (In 000 units)							
Quarter		2013	2014	2016	2017						
		45	48	49	52	60					
	11	54	56	63	65	70					
	111	72	63	. 70	75	83					
	IV	60	56	65	72	86					

Q.8(a) Differentiate between (i) p and np chart (ii) Variable and Attribute chart.

(b) From a pharmaceutical company samples of 250 bottles were taken daily for 15 days. The number of defective seals in these bottles is given below. Obtain control limits for fraction defectives and comment on it.

Ē	B	4	2	2	4	F	-	7	0	ο	10	11	1.7	13	14	15
- [	Day	T		D.	4	3	U	, ,	U		10	**	1L	10		13
_ [	No. of defective seals	28	18	40	42	32	62	50	10	30	22	80	62	76	56	30

OR

Q.8(a) State the various causes of variations in the production process. Write in brief about them.

(b) A company manufactures valves for industrial use. Ten samples of 150 valves each were taken from the production line and tested. The results are reported below:

Sample No.	1	2	3	4	5	6	7	8	9	10
No. of defectives	32	18	07	16	09 .	29	32	13	18	07

(i) Construct control chart for no. of defectives using 3 $\sigma$  limits. (ii) is the process in control?
