5. The author's views on art of living

Q.3 Write a paragraph on any one of the following. (10)

1. My favourite author
2. Global Warming
3. Life as College Student

Q.4 Write a précis of the following passage. (10)

One of the major problems we have to face is that of unemployment. It is a big problem, a human problem, which we cannot ignore. Yet in looking at it, it has to be remembered that merely giving some kind of occupation to a large number of people does not ultimately increase employment or lessen unemployment. Employment comes from newer and more effective means of wealth production. The whole experience and history of the past 200 years shows that it comes through the growth of technological methods. Do not imagine that we can effectively deal with the problem of unemployment without technological progress. We cannot. Every country which boasts of full employment today is a country which is technologically advanced. Every country which is not technologically advanced has unemployment or under employment. Therefore, if India is to advance, she must advance in science and technology. The fact is that our poverty is due to our backwardness in science and technology. If we remedy the backwardness we create not only wealth but also employment.

(1)

(PTO)
