M. Sc. (Industrial Chemistry), Third (3rd) Semester Examination November - 2017 Alex to all ladged and are leaded

	PS03CICH02—Spe	ectrosocpy and Instrumental Techniques of the sector of th		
Time: 02	2:00 p.m. to 05:00 p.m.	Total Marks:	70	
	Attempt all the questions. Figures to right indicate full man	rks. **Requires.************************************	e e	
(80) -1	Answer the following Multiple How many spin states of hydro	le Choice Questions.	Ma (C	rks 08)
(89)	a) 1 b) 1/2	c) 2 character on the enterior of the enterior		
(£0) 2 .	goes to second vibration energy a) Combination b) Overtone	molecule in a lowest vibration energy level directly gy level. c) Fermi d) All of these mined usingtechnique.		
	a) IR	c) mass spectrometer		
	b) NMR	d) All of these		
(80)4.	Soft ionization technique is us	ed intechnique.		
	audien a) MS-MS referrouse	ga saic) Quadrapole was to mangath attamenta ward	(a)	
	b) Time of flight	d) Single focusing		
(80) 5.	In ideal case, the partition ratio chromatographic system.	o isover a wide range of solute concentration in		
	h) variable	c) decreasing them says to ladoning sayosic		
(30) 6.	Eddy diffusion arises from the	magnitude of potamouris natural to vice at the least		
	a) path way	c) pressure as and each a compare of nigligible		
	b) flow	d) temperature		
7.	is typically by far the	strongest X-ray spectral line for an element bombarded maximally intense X-ray emission.	(E)	
	In to enject a			
	b) M-alpha	d) N-alpha		
(80)	A SEM may be equipped with compositional analysis on spe	ansystem to enable it to perform ecimens.		
2.00. C to C an	a) EDX analysis b) TEM	c) camera d) optical microscopy		

Q-2		Answer the following short questions. Each question carries equal mark.(Any Seven)	(14)
	1. 2. 3. 4. 5. 6. 7. 8.	Enlist various modes of vibration in IR. What is Beer's law for absorption? What are the properties of solvent used in NMR? Give the equation of resolution in mass spectrogram. Give cleavage of 1-pentene. What is guard column? Write Van Deemter equation for chromatography. What is Moseley's law? What is the fundamental principle of SEM?	eest 1
Q-3	(a)	Give possible band and vibration frequency of alkynes and aromatic hydrocarbon in IR spectroscopy.	(06)
Q-3	(b)	Explain the effect of temperature on chemical shift value of a) N, N – dimethyl formamide and b) 1, 2- dibromo ethane. OR	(06)
Q-3	(b)	A) before and the constant to the state of t	(03)
Q-4	(a)	2) Derive the mathematical relationship between ΔE and B_0 in NMR. Draw schematic diagram of double focusing mass spectrometer and explain various parts of it.	(03) (06)
Q-4	(b)	Explain with figure time of flight (TOF) mass spectrometer.	(06)
Q-4	(b)	Discuss principal of mass spectrometer with suitable example.	(06)
Q-5	(a)	Explain the theory of elution chromatography.	(06)
Q-5	(b)	Explain the sources of zone broadening in liquid chromatography. OR	(06)
Q-5	(b)	Write a short note on a) peak asymmetry and b) column resolution in HPLC.	(06)
Q-6	(a)	Draw a schematic diagram of DSC and explain various parts of it.	(06)
Q-6	(b)	Draw a schematic diagram of dispersive x-ray spectrometer and briefly explain the various parts of it. OR	(06)
Q-6	(b)	1) Write a note on detection of backscattered electrons in SEM.	(03)
		2) How to detect secondary electrons in SEM?	(03)
